

Djibouti MICS 2006

Table - Coverage of Countdown indicators at national level and by key equity stratifiers. Please see the example cover profile for guidance on interpreting the table and graphs.

	Family planning need satisfied	Contraceptive prevalence rate	Antenatal care 1+ visits with skilled provider	Antenatal care 4+ visits, any provider	Skilled attendant at delivery	C-section rate	Early initiation of breastfeeding	Postnatal care for babies born at home	Postnatal care for all babies	BCG vaccine	DTP3 vaccine	Measles vaccine	Vitamin A in last 6 mos.	ORT and continued feeding	ORS (packet or pre-packaged)	Care seeking for pneumonia	ITN use by children	Improved drinking water source	Co-coverage (less than 3 interventions)	Co-coverage (6 or more interventions)	Composite coverage index

Note: the cocoverage indicator was not calculated for MICS surveys.

Source: Djibouti MICS 2006

Coverage levels are shown for the poorest 20% (red circles) and the richest 20% (yellow circles). The longer the line between the two groups, the greater the absolute inequality. For quintiles with small sample sizes, estimates are not shown in the graphs.

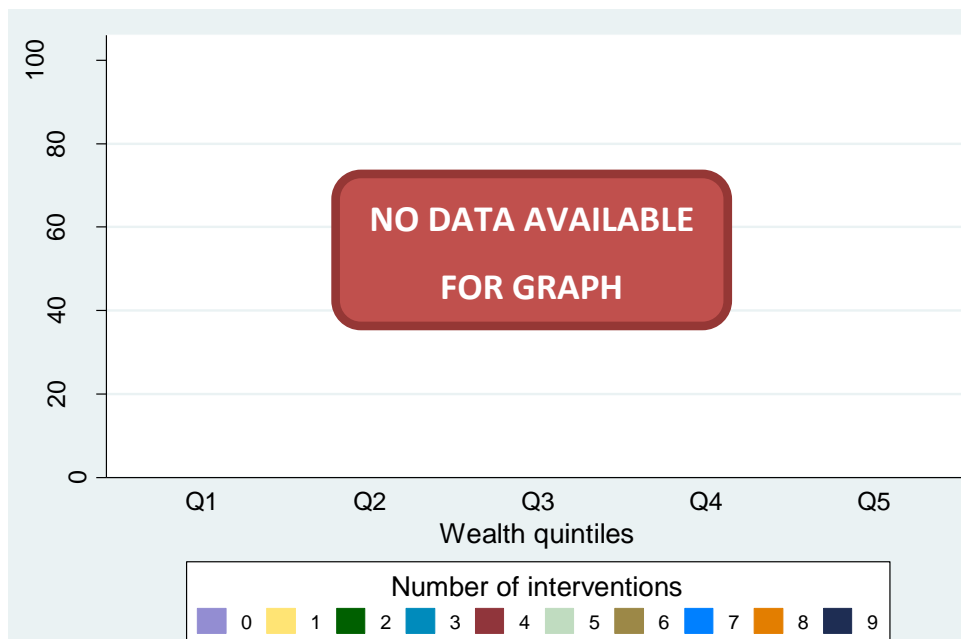

Source: Djibouti MICS 2006

The horizontal lines connect the richest (yellow circles) and poorest (red circles) quintiles. The longer the line between the two groups, the greater the absolute inequality. For quintiles with small sample sizes, estimates are not shown in the graphs.

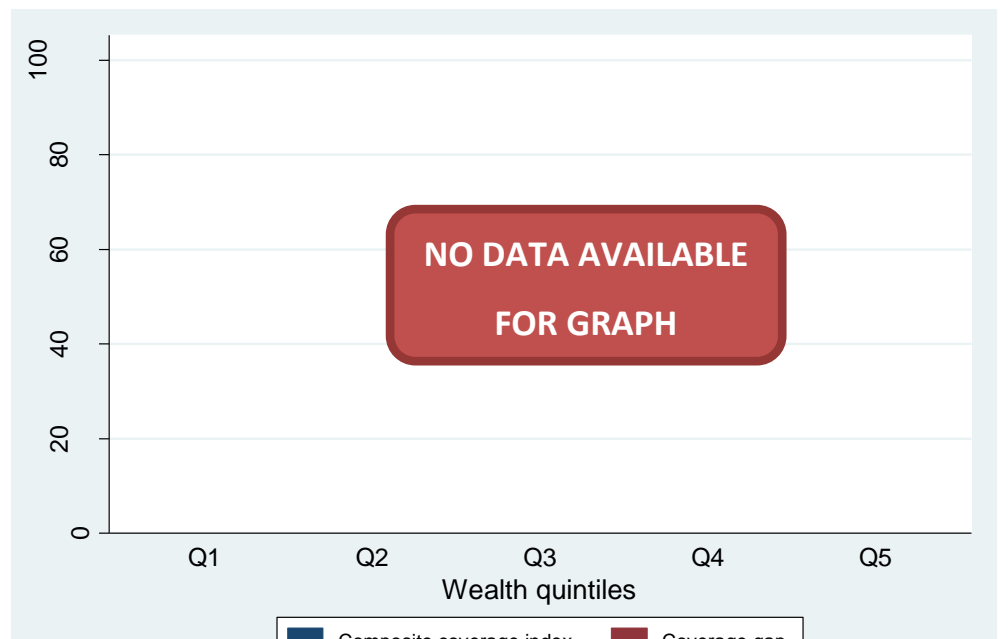

Figure 1 - Coverage levels in the poorest and richest quintiles for selected interventions along the continuum of care.

Figure 2 - Coverage levels in the five wealth quintiles for selected interventions along the continuum of care.

Source: Djibouti MICS 2006

The maximum number of interventions for this survey is 9.
